

MEPMOBIL SELF STORAGE MOBILE STATION SOLUTIONS

MEPMOBIL series is functional, low-cost, portable and compact fuel stations, which provides safe alternatives compared to traditional fuel stations,

Usage areas;

- Seasonal Requirements; (Holiday spots, marinas, agricultural areas, etc.)
- Private Events & Organizations (Motor sports, etc.),
- Construction Sites,
- Mining Industry,
- Fuel supply for large fleets and in-house refueling sites (big corporations, transportation companies, etc.),
- Forecourts on which installation, revision and maintenance operations are conducted.

MEPMOBIL advantages compared to traditional fuel stations

- Low cost,
- Portable,
- Compact structure,
- Set and operate,
- Fast and easy installation,
- Lower process on fueling site, low infrastructure costs,
- Conservation of the natural environment,
- High safety protections,
- Contemporaneous and strong engineering structure design.

your station
is always
with you...

MOBILE PRODUCTS

MEPTANK TYPE 1

The largest and the most-equipped solution in MEPTANK family. You could refuel your vehicles from 16.000 liters to 30.000 liters. There are many alternative tank options.

MEPTANK TYPE 2

The smallest member in the MEPTANK family. It only requires to be installed wherever you want. It has 5.000 liter tank capacity and it has all the qualifications like our other Mobile products.

MEPMARIN

Marine model of the MEPMOBIL family. With its special filling system you could fill any boat. With its special paint it does not get affected of sea water and moisture. It is durable and aesthetic.

MEPTANKER

With MEPTANKER your tankers also have a fuel pump. All the features are the same with fuel pump. Thus, you have a chance to do preset-sales. If you would like, you could attach cash register or sales slip. All the features are on your vehicle and you could control it from your cockpit.

MANUFACTURING OF MOBILE STATIONS

MEPMOBIL; is evaluated in 3 main groups in design and production :

• CONTAINER

• FUEL TANK

• FUEL PUMP

The containers used in MEPMOBIL are used for freight container. It is produced in accordance with the TS 1360 standards by an expert production firm. In special manufacturing the required carriage limits and endurance is calculated. Manufactured containers are sent to MEPSAN/Konya plant in order to do the required insulations. For heat insulation, rock wool is placed in the container and covered with 1.20mm thick galvanize material. This insulation provides a 2-hour fire-resistance for MEPMOBIL. The ventilation windows are located on the containers in accordance with the standards. The inner and outer surfaces are made of ST 37 material and resistance to corrosion is enhanced by epoxy paint. In between the outer and inner surfaces, aluminum casing rock wool insulation is used to resist blaze and heat.

The fuel tanks are also manufactured by expert firms in accordance with the TS 712 standards. Optionally, the tanks are taken to overflow pools and designed in cylindrical shape according to the TS 712. The outer surface of the tank could be painted. As long as the inner part not getting affected by the fuel, it could be painted in a special paint. This increases the endurance against corrosion and the fuels cleaning and features are safely kept.

Cosmic series fuel pumps are used in our mobile products, which are UNIMEP brand MEPSAN manufactured for industrial usage (Refer to Cosmic Fuel Pumps). With the coherent software, if desired, UNIMEP printer system could be integrated into mobile filling solutions and sales could be documented on site.

FUEL PUMPS

All the materials used in our mobile products are Ex-proof for safety (electric equipment, control panel, lighting system, electric motors). In order to prevent hazards before occurring, there are precautionary warning signs, an emergency stop button and 12kg. fire extinguisher which are found standard in MEPMOBIL products.

• The base, in our mobile products, is suffused with aluminum patterned material. This way it has an aesthetic view and can be used for years without any deformation.

• The piping system is installed below the chassis which supports the aesthetic view.

• MEPSAN is the only Mobile Station manufacturer in Turkey holding TSEK and Production Compliance Certificate

• Our mobile products are envisaged considering overseas applications, forecourt experiences, SHE rules and engineering know-how's.

• Our Mobile products are manufactured in Konya Plant by our specialized team.

TECHNICAL FEATURES

	Mepmobil	Meptank
ISO 1496-1 container	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Heat Insulation	<input checked="" type="checkbox"/>	-
Segregated dispenser, tank generator compartments	<input checked="" type="checkbox"/>	-
Single wall	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Double wall	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Containment sump for storage tank	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Containment sump for filling	<input checked="" type="checkbox"/>	-

DO YOU KNOW?

If you would like, you could own all MEPTANK and MEPMOBIL models in 3-sectioned tank options.

In addition for your products, one fuel pump is enough for the 3 sections. Also you could internally own; selling two products at the same time, cash register, sales slip, automation system, card reader, and vehicle identification system. To own all these you don't have to do extra budgeting for different corporations features and equipment investments. Because you could own all these with MEPSAN MOBILE PRODUCTS.

Mepsan has the right to change all the technical features without giving any notice.
