

## Vision

### Meeting your expectations....

Customer needs are rising parallel to the technological developments. Competition conditions are getting harder because of the increasing needs and decreasing margin of profits. Your company should give differentiating solutions to the customers. The importance of the fuel dispensers at the forefront are rising, because it is the main contact point reaching to your customers. At this point vision series pumps are considered.

For the communication with the customer to be more efficient, vision series dispensers are envisaged with multimedia devices to be an interactive marketing tool.

Your customers could find the address that they are looking for from our internet based maps, could get online information about the weather reports and the traffic conditions; they could even look at their points and the gift coupons over the pump. You could give information about the updated promotions, campaigns or security precautions. Also you could use these kinds of channels for advertising and marketing purposes.

#### Vision Series

#### The most Equipped Seller At Your forecourts

**It would make your customers appreciate your fuel station**  
The customers will have a good time while filling their fuel tanks, and this will accomplish customer loyalty and appreciation.

**It will increase your customer number and vehicle traffic**  
It would help to increase your customers in the station by promotions, advertising and coupons.

**You would be able to manage your station network locally and nationally**

You could announce all your promotions, advertising, and announcements at your country at the same time, or at one station, or regional.

**It implements content management with you synchronously**  
You could program any information and content that you want to publish and implement it anytime you want.

**Your pumps will become your best heavy selling employees**  
With the promotions you do, you gain more customers and reduce the waiting period in front of the dispensers which makes you give more service to the other customers.

For people  
who want  
more from  
fuel pumps...

### WHAT FUNCTIONS DOES VISION HAVE?

#### MEDIABOX

MEPSAN media solutions, with the help of the LCD screen, can have a big role at rising your profit from the filling point.

#### INFORMATION SCREEN

With OnVision™ technology, which is developed by Mepsan, at the filling moment you could give information to your customers about the weather, traffic, roadmap and money markets synchronously.

#### CASH REGISTER - POS

Our cash registers are approved by the ministry of finance and is offered to you installed on the dispenser.

**POS Terminal :** POS terminals are integrated with our cash registers. It is compatible to all bank credit cards and it provides the customer to pay at the filling point. By this way you could give faster service at the pump island and reduce the waiting period of the other customer.

## WHAT OTHER FUNCTIONS DOES VISION HAVE?

## • Antistatic Button

Antistatic button is designed by Mepsan. It takes all the accumulated static electric from you before filling. This makes a maximum secure filling.

## • Cash Payment Terminal

There is a self-service filling opportunity at VISION series. Also at the filling point the customers can do cash payment.

## • New Selling Screen

New generation backlight selling screen does not only show the sales information. With the font at the bottom you could give your stations information or any message that you want to give continuously to your customers.

## DO YOU KNOW?

The other product of the Vision family is XM. At both sides of the dispenser, there are 2 nozzles and you could sell up to 5 products with these 2 nozzles.

Vision XM has a technology that you could give gasoline derivatives from one nozzle and diesel derivatives from the other nozzle. The only thing that you have to do is to press on the wanted product button.

All Vision Series fuel pumps are certified by the European Union associations and institutes that are accredited. (A2 type approved, ATEX etc.)

Mepsan has the right to change all the technical features without giving any notice.
