

UNIMEP PCR 05

Our cash registers have been specially envisaged for fuel stations. It has been designed for outdoor forecourts. No matter what kind of a climate there is or forecourt circumstances, with its aluminum body, it is durable for many years. Our cash registers are kiosk type and could be mounted on the pump. This makes your station more aesthetic and will not take a lot of space. With multi PCR 05 model cash registers, you could have the sales information of two different pumps from one cash register. This would minimize your stations accounting rate of return. The software was written by considering the forecourt personnel. It is written in Turkish and a simple language has been used. It is user-friendly, and a high performance in the forecourt. It has been the most preferred cash register brand in Turkey.

- Special Design for fuel stations
- Special production for forecourt conditions
- Enduring aluminum
- Easy montage with its compact kiosk structure
- Easy and simple usable menu
- 7/24 Technical Support Opportunity
- With 38 Service Point excellent service

Technical Features

Voltage	220 V AC - 50 Hz
Power	30 Watt
Insulation Resistance (500 V DC)	>100 Mega Ω
Insulation Test	1500 V AC - 60 sec.
Screen	2x16 Matrix LCD
Key Pad	6x8 Matrix - Faraday Latticed Membrane
Paper size	37 mm. Thermal
Operation Range	-20 °C / 60 °C
Printer feature	Thermal Point Printer
Printer Life	50 Km.
Communication	RS 485
Max. attachable interface	2
Simultaneous filing	8
Guard degree	IP 54
RF Reader (Proximity)	125 kHz

UNIMEP PCR CARE & REPAIR NORM

REPAIR & CARE

- Guarantee life of the printer is 5,000,000 cm. (About 700,000 active sales)
- Keypad guarantees 500,000 times to press the same keypad. (About 3 years life.)

- All the electronic components and cash registers are guaranteed for 2 years

Single producer,
Single service,
One guarantee.

UNIMEP PCR 07+ POS

Growing technology and competition has made the distribution companies at the fuel stations with more system choices for the customers to pay.

These paying types are:

- Credit Cards
- Loyalty cards
- Gift Cards
- Customer Identification Cards

UNIMEP PCR 07 has all these paying types. It also has a recording function for the payments which is a new generation outer environment device.

At UNIMEP PCR 07 model, POS module and ECR module uses the LCD screen and printer together which is ergonomic.

The sales information comes to the POS automatically and the paying process being done on the pump raises the efficiency at the station tremendously.

Suitable to UNIMEP PCR 07 "single POS Project", dial-up connection opportunity is available and ETHERNET PORT is submitted standard.

ECR module, working with the electronic journal unit ends the journal paper saving process, UNIMEP PCR 07 could record up to one year even at a very busy station.

With ethernet port or RS485 port, UNIMEP PCR 07, could be integrated with third party systems.

**DO YOU KNOW?**

Pos devices are one of the biggest expenses of fuel stations. Every device means cost and a high telephone bill. From now on, in your station market, you don't have to keep many POS devices that belong to the different banks. Besides, you could forget the high telephone bills. Unimep PCR 07 cash register can use all the bank cards that have an agreement with the POS and you could handle all the points, install etc. from one POS. Also you don't need an extra telephone line for doing all these. ADSL line is enough. You won't have long paying lines in your market anymore.

Mepsan has the right to change all the technical features without giving any notice.
